

CARBON CYCLE

WHAT IS CARBON?

- An element

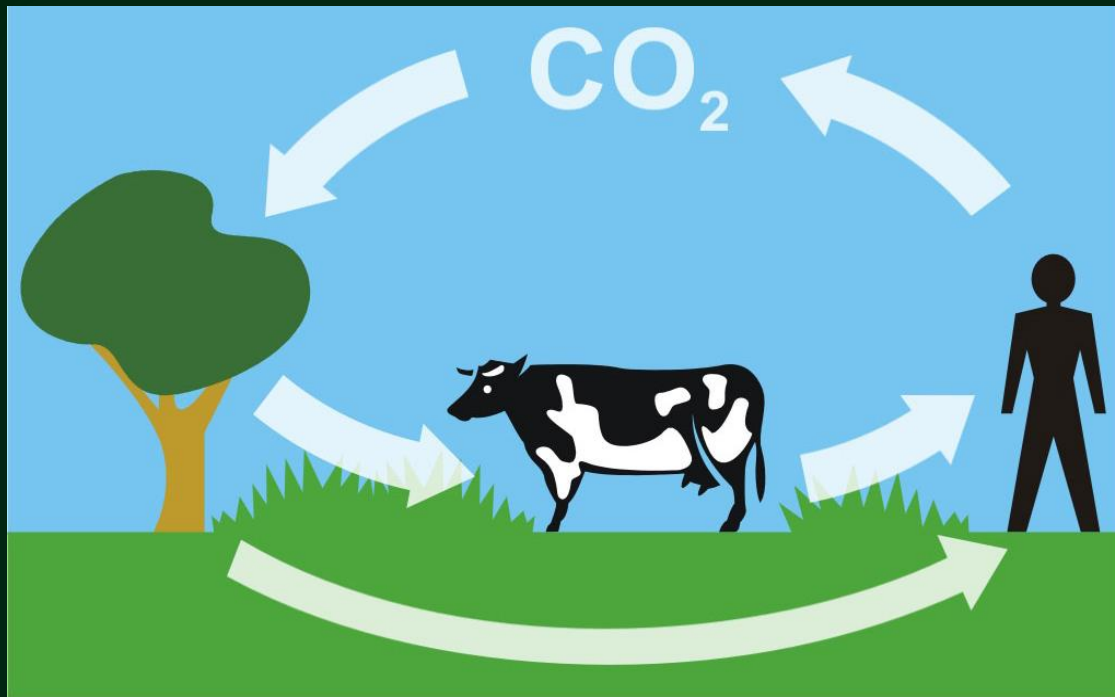

- Found in all living cells

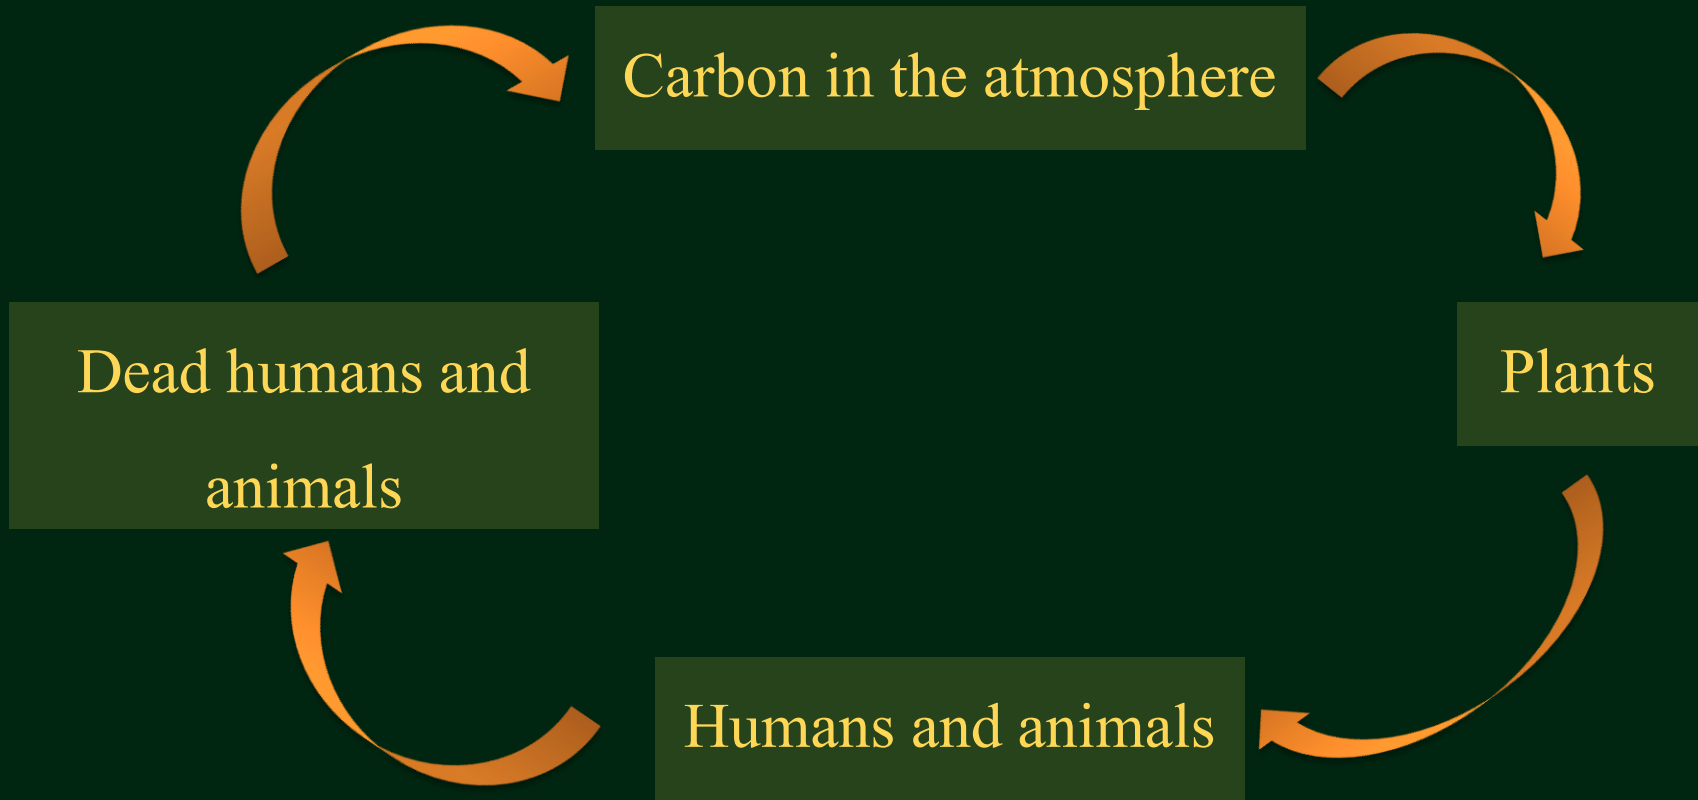

WHAT IS CARBON CYCLE?

- The moving of carbon **from earth** **to atmosphere**.

CARBON CYCLE

Carbon **goes inside** by:

Photosynthesis (**plants**)

Eating plants (**humans
and animals**)

Carbon **goes outside** by:

Breathing out by
humans and animals

Decomposition (dead
plants, humans and
animals)

Combustion (smoke
from cars and factories)
